

Agenda & Green Tiger members presenting

 10:40 – 10:55 Green Tiger, Helen Aavisto

 10:55 – 11:10 Bolt, Kadi Jette Tamjärv 

 11:10 – 11:30 Lindström, Roland Raud & Gerda Männistu  Lindström

 11:30 – 11:45 Trinidad Wiseman, Marko Nember 

 11:45 – 12:00 Q&A, discussions

Rohetiiger

Let's Jump Together into Greener Future!

Two sources of inspiration

TIGER LEAP:

Similar to Tiger Leap project
Green Tiger aims at a
fundamental change of society
but in the focus of
sustainability.

LET'S DO IT WORLD:

Let's Do It focused on the
consequences, Green Tiger
works on causes.

Who is Green Tiger?

Green Tiger:

-  is **cooperation platform** for sectors of society
-  has a goal of creating a vision and a plan for **a model of balanced economy** in Estonia
-  aims at creating a **social contract** for execution of balanced economy plan

Rohetiiger

Vision for Balanced Economy

The challenge – Estonia lacks a common vision for sustainability.

The core – 5 Sector Roadmaps (energy, construction, transportation, land use, Industry & circular economy)

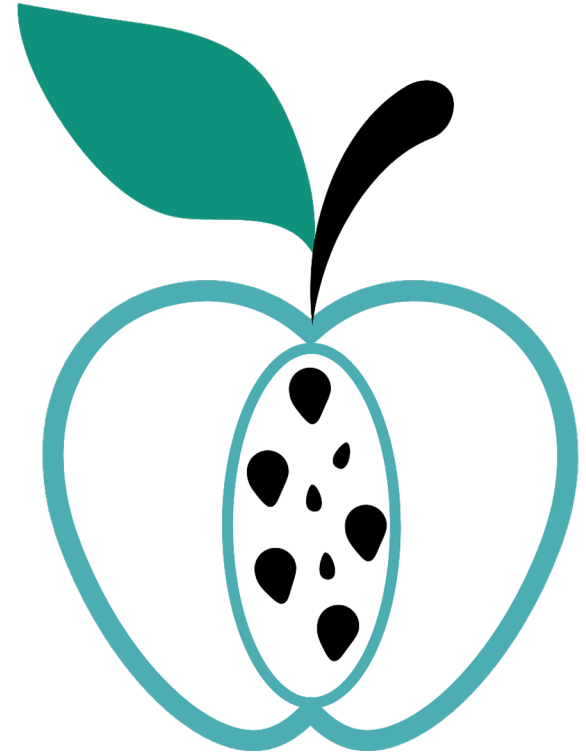

and Action Plan 2040.

The pulp – Concept for Balanced Economy.

Surface of the apple – vision and new green narrative for Estonia.

Green Tiger Energy Roadmap

- 🐾 Estonia relies on fossil sources of energy. Renewable energy has the **lowest footprint and is the cheapest form of energy.**
- 🐾 Estonia needs **2000 MW windfarms** (currently 320 MW) and **1300 MW solar parks** (currently 500 MW).
Need for energy storage and controllable power around 2000 MW.
- 🐾 **Energy saving** is an important focus.
- 🐾 Need for **dispersed electricity production.**

[Roadmap can be found here!](#)

Roadmap for construction

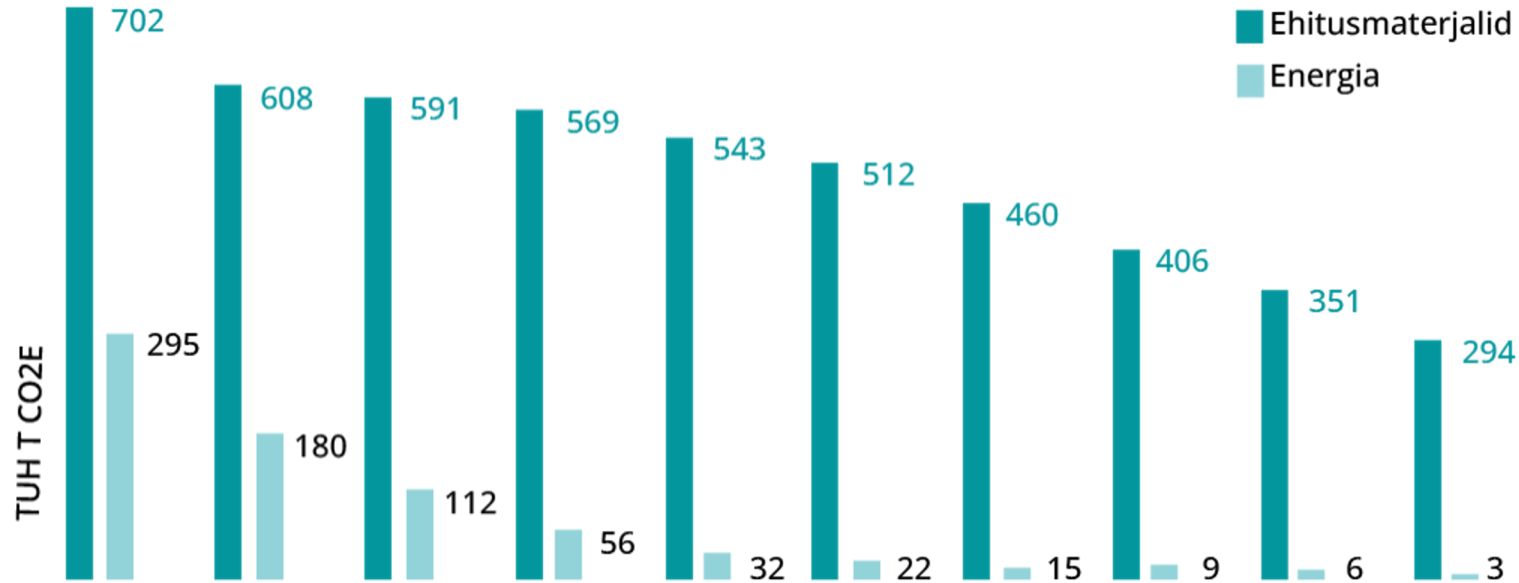

- 🐾 **One of the root issues of Estonian cities is car-centric city planning.**
- 🐾 **Focus on renovation:** an important means for higher energy efficiency, job creation and supporting new businesses.
- 🐾 **Low Carbon Construction:** not enough know-how, innovative public procurement and data access.

[Read more here.](#)

Goal 2040: 85% less CO₂

Graph: carbon emissions of construction and building material production (tons of CO₂)

Transportation roadmap

- 🐾 One of the core challenges of Estonian transportation is **car-based urban planning**.
- 🐾 Three main principles:
 - 🐾 **Priority on public transport network and active means of transport (e.g. biking)**
 - 🐾 **The need to create prerequisites for electrification of means of transport**
 - 🐾 **Support the logistics sector in transfer to zero-emission cargo-hauling**

Green Tiger's Community of Sustainable Businesses

Together we make it further!

**United action is more impactful than
individual steps by different
companies**

Three Pillars of Value Proposition

and tools

Community

Collecting
sustainability
requirements

Specific events and trainings

Variety of events:

- 🐾 Sources of sustainability funding
- 🐾 Overview of EU regulation:
taxonomy, CSRD, Due Diligence
directive, ecodesign, biodiversity
- 🐾 Panel of Banks
- 🐾 Sustainable events
- 🐾 Green office principles
- 🐾 Sustainability reporting hackaton
- 🐾 Panel on avoiding of
greenwashing
- 🐾 Meetup with cleantech startups
- 🐾 Etc, etc

Visits to other members

We visit a lot of interesting organizations:

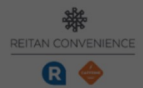

Agrone, Lindström, Tallinna Sadam, Scandium, Rally Estonia, Utilitas, Ragn-Sells, Paulig, Ülemiste City, Lennujaam, Reitan Convenience.
